Assignment: Hosting a Static Website on Amazon S3

Total Points: 10

1) (2 PTS) From Amazon S3, create a bucket. Include a screenshot to show the created bucket.

2) (2 PTS) Configure your bucket to enable website hosting. Include a screenshot that shows:
Static website hosting is Enabled.

3) (2 PTS) Upload website files to your S3 bucket: *index.html* and *bitbangers.png*.
Include a screenshot that shows the two files in your S3 bucket.

4) (1 PT) Set public access permissions on your bucket. Include a screenshot that shows your bucket name with evidence of public access permission.

5) (1 PT) Add a bucket policy, which should include your ARN. Include a screenshot from the Permissions tab that shows the Bucket Policy.

6) (2 PTS) Visit the URL of your webpage, making sure to include the correct bucket name and region in the URL. Include a screenshot of the webpage.

7) Empty and delete the S3 bucket
